

## Tell me about yourself

Good morning, thank you for giving me the opportunity to introduce myself.

My Name is Nithya and I'm from Vellore, Tamilnadu. I have completed my Bachelor's in Electrical and electronics engineering in 2017 and since then I was preparing for civil service exams which built my interest in data analysis and problem solving.

Over time, I have developed strong technical skills in tools widely used in the data analytics domain including Excel, SQL, Python and Power BI.

I have applied these skills in practical projects such as analyzing sales trends and building interactive dashboards.

As a fresher, I'm eager to start my career, learn new technologies and contribute efficiently to the organization.

Thank you.

2) why did you choose a career in data analytics and data science.

I choose a career in data analytics because I enjoy finding hidden insights in data and turning them into useful decisions.

3) what do you know about our company and why do you want to work here?

Your company is known for innovation and employee growth. I believe it's perfect place for me to start my career and contribute.

- 4) Describe a time when you faced a challenge in a project and how you handled it.

In a dashboard project, some KPIs were incorrect due to inconsistent data formats. I cleared the data and standardized the formats and the results became accurate.

- 5) How do you handle tight deadlines or pressure at work?

I stay calm, prioritize tasks, and focus on solving problems step by step.

- 6) How do you explain complex data insights to non-technical people?

I translate data into clear stories, what happened, why happened and what action to take.

- 7) Describe a situation where your analysis or recommendation made a positive impact -

My excel dashboard analysis identified key trends and helped improve performance through better decisions.

- 8) How do you handle feedback or criticism?

I see feedback as a learning opportunity. I ask clarifying questions and apply the suggestions to improve my work.

- 9) What are your short-term and long-term career goals?

To develop expertise in my field, take on responsibilities and contribute to the company's success. My long-term goal is to become a skilled data scientist.

10) what motivates you to do your best work?

I'm motivated when I see my analysis helping teams make confident, data driven decisions.
